

WHAT IS CLAIMED IS:

1. A program product comprising:
a computer readable medium; and
program instructions stored on said medium accessibly to an information handling system and effective when executing to:
aid a user to navigate a route through a facility having a plurality of selected locations
by:
storing an interactive route from a first selected location to a second selected location within said facility;
storing polling data of at least one label for item information associated with said label,
analyzing interactive route information and polling data at a predetermined time and communicating assistive information to said user in response to interactive route and polling data.
